DETAILED ACTION

1. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Group Art Unit 1648**. Claims 1-48 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1-28 and 35-36, drawn to a method of inhibiting HIV infection by administering a serpin, classified in class 435, subclass 5.
 - II. Claims 29-34 and 37-42, drawn to a serpin, classified in class 530, subclass 300.
 - III. Claims 43-48, drawn to a kit comprising antibodies to serpin, classified in class 424, subclass 130.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product, serpin, can be used in a method to determine exposure to serpin by detecting antibodies.

Inventions (I and II) and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to serpin/method of use, and antibodies to serpin. These products

Art Unit: 1648

are not disclosed as capable of use together and they have different modes of operation, different functions, and different effects.

Because these inventions are distinct for the reasons given above and the literature search required for one group is not co-extensive for any other group, restriction for examination purposes as indicated is proper.

A telephone call was made to Michel Morency on May 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
